# FAIRY TALES

Fairy tales are told in many lands all over the world to young children. One may find these tales violent and scary. One may also wonder why we should indulge children in fantasy when real life rarely works like a fairy tale?

Maria Tatar, a Harvard College professor who teaches students about fairy tales, says, "They [fairy tales] work through so many personal and cultural anxieties, yet they do it in a safe, 'once upon a time' way." (source: "Why Fairy Tales Matter" by Hannah Boyd, Education.com archive article). In fairy tales, challenges are overcome when the protagonists find inner strength and wisdom to triumph over the roadblocks.

Another positive aspect of reading fairy tales is that it gives children the opportunity to let their imaginations roam. In a world full of graphic intensive electronics, it is perhaps a reprieve for children to

have their own imaginings played out in their own minds.

Children can now grow up with many updated versions of classic fairy tales that give new twists to the stories, often involving stronger female heroines. These versions are called "fractured fairy tales". Adults may decide to read these to kids alongside the classics, to make comparisons and to encourage discussions. You can check out some of these fractured fairy tales at the library.

#### Fractured Fairy Tales

"A fractured fairy tale is a story that uses fairy tales you know and then changes the characters, the setting, points of view, or plots."

#### Early Literacy Activity with Fairy Tales

Read a traditional version of a fairy tale, and then ask the children to:

- come up with a different ending for the story,
- or add twists to the plot,
- or change the characters in the story.

Kids can also illustrate or make a dramatic play of their story. Children's ability to retell stories, and their understanding of how a story works (beginning, middle and end) will be strengthened. Research shows that talking, singing, reading, writing and playing are important early literacy skills that help children become successful readers. What a great adventure it will be to look back at all the stories that your child has created over time!
